1. INTRODUCTION

- 1.1. This policy supports STAHS's vision that the School will deliver a transformational experience which educates young people for lives of consequence, sets high expectations for our academically ambitious pupils, and provides an exceptional environment in which to work and study and make significant positive contributions to our local community and wider society. To ensure this is the case, STAHS has in place rigorous processes and systems to ensure high quality teaching, learning and assessment across the School.
- 1.2. STAHS is an academically ambitious school with high expectations of its pupils and staff with the aim of providing a platform for success beyond school for all pupils, aiming to ensure pupils can thrive no matter the pathway they choose. We help pupils to develop the knowledge, skills, and interests to make ambitious yet realistic and exciting choices about their futures as individuals. We are a community of learners who enjoy and benefit from academic rigour and intellectual challenge.
- 1.3. This document provides an oversight of all areas of teaching, learning and assessment at STAHS with further information included in each of the accompanying Related Documents, a list of which is provided at the end of this policy document. These are reviewed regularly as part of the policy review cycle to ensure they remain accurate and effective.

2. TEACHING

- 2.1. We value and pursue excellence in the classroom, selecting and developing teachers who are skilled in encouraging children to think critically and analytically, and who inspire a love of the subject and of learning. We use our Teaching and Learning Framework, a Related Document to the Performance Development Policy, to help steer teacher recruitment, scrutiny, and an active, ongoing culture of Continuous Professional Development (CPD). Our Performance Development framework ensures the development of teaching in line with department and School objectives as well as individual personal development is at the core of how we operate.
- 2.2. The STAHS Competency Framework, outlined in the Related Document for the Performance Development Policy, outlines the expected behaviours and attributes for Teachers, Middle Leaders and Senior Leaders. Teachers self-assess against these competencies and work with their line manager to identify strengths and areas for development. Further quality assurance of teaching and learning comes through ongoing and purposeful lesson observation, learning walks and work scrutiny carried out by Middle and Senior Leaders. Templates for these and further details can be found in the Performance Development Policy.
- 2.3. Our teachers value pupil motivation, confidence, ambition, and individuality and aim to stretch and challenge each and every pupil, and ready them to thrive in their life after their education at STAHS. Lessons are designed such that the educational needs of all are met, including those with SEND, EAL and those who are considered More Able. Teaching at STAHS ensures that typical academic needs are met, but that an importance is placed on development of skills, knowledge and interests that provide pupils with opportunities to take their learning further. Teachers foster intellectual curiosity in our pupils and challenge them to be ambitious and adventurous.

3. CURRICULUM

- 3.1. We are working towards a curriculum that is inclusive, diverse, and comprehensive. It promotes the acquisition of knowledge, skills, and interests as an exciting platform for success for all children within and across STAHS. This includes experience and development in linguistic, mathematical, scientific,

technological, human, and social, physical and aesthetic, and creative education. It also seeks to prepare pupils for the opportunities, responsibilities, experiences, and challenges of life beyond school.

- 3.2. Pupils in Reception follow an adapted Statutory Framework for Early Years Foundation Stage. Schemes of work for Year 1 to Year 13 are followed, which are set out in the Prep Curriculum Overview Map and the Senior Department Schemes of Work. The curriculum also includes PSHE and RSE (where age appropriate), respect for Fundamental British Values, Computing/ICT, and access to impartial age-appropriate Careers and Higher Education information and advice. Some aspects of the wider curriculum are delivered in formal lessons, and this is complemented through delivery via tutor/form time, and in the Sixth Form also as part of the STAHS Diploma. In the Prep School, the curriculum is overseen by the Subject Coordinators at a subject level and the Senior Deputy Head. In the Senior School, the curriculum is overseen by Heads of Department or Subject Coordinators, the Director of Studies and the Deputy Head Academic.
- 3.3. Pupils throughout STAHS are challenged through the curriculum and activities beyond the curriculum. This is most effectively demonstrated through outstanding teaching such that pupils experience day-to-day opportunities to take their knowledge and skills beyond the confines of a curriculum and exam syllabus. We provide pupils with structures and opportunities beyond the curriculum to be challenged academically, for example through entry to national academic competitions, our own internal academic House Events, the Senior School SuperCurriculum, the Year 7 Passport and the STAHS Diploma in the Sixth Form.

4. LEARNING

- 4.1. The purpose of the curriculum is to stimulate an enjoyment of learning by the pupils and to raise their levels of academic ambition. Learning progression through STAHS develops pupils' confidence and resilience and seeks to enhance their understanding of their own strengths and weaknesses to make informed choices about their learning and futures. Subject and cohort curriculum maps and schemes of work summarise this progression.
- 4.2. All pupils throughout the School receive feedback and support, including from Year 1 to Year 13 formal reports that outline their approach to learning and their level of progress, through their Approach and Achievement scores. It is through reflection and response to this feedback that pupils make the most significant progress, which is facilitated through ongoing feedback in tutor/form time, lessons and as part of our Tracking systems.

5. ASSESSMENT, TRACKING AND REPORTING

- 5.1. Regular assessment, tracking and reporting is essential to help pupils understand, develop, and fulfil their academic potential. Successful teaching and learning is underpinned by the use of educational data in order to inform reflection, dialogue, planning and any necessary intervention. Pupil progress data is held in teacher mark books, centralised department, subject and/or year group tracking sheets, and through our whole School Management Information System.
- 5.2. Pupils are assessed and given feedback in an ongoing nature in all lessons, through questioning and receiving regular verbal feedback, alongside homework and formal internal and external assessments. All pupils are assessed using baseline testing from CEM, using the BASE and InCAS assessments, with CATs in Year 5, in the Prep School and MidYIS, Yellis and ALIS in the Senior School. The School utilises these baseline assessments to ensure the amount of pupil progress being made is well understood, and feedback and intervention can see all pupils thrive.

- 5.3. There is an ongoing dialogue with pupils through the form teacher/tutor, the pastoral team, teachers, and parents. Pupils are given opportunities to reflect on their work in lessons, and on their general progress, at regular intervals throughout the year.
- 5.4. We engage with parents regularly formally through our robust reporting schedule, which sees each year group receiving frequent feedback from the teachers. This is typically an approach to learning and their progress but includes extended written reports and Parents' Consultations/Evenings. The achievement and progress of pupils of all abilities, learning needs, and protected characteristics (as defined by the UK Equality Act 2010) will be monitored and reviewed as far as reasonably possible, to support the fulfilment of potential.

6. HOMEWORK

- 6.1. Completing and reflecting upon homework is essential to making good academic progress, to intellectual enrichment, and to the development of personal organisation. Pupil progress is driven via the provision of formative feedback by teachers and its follow up and implementation by pupils.
- 6.2. All pupils at STAHS are set homework, which regularly includes age-appropriate enrichment activities or opportunities. In the Prep School, pupils are encouraged to read daily. From Year 1 they are given weekly spellings, times tables and access to maths online platforms (Mathletics in Pre-Prep, Century Tech in Prep). The quantity of homework increases as pupils progress through the Prep, and it diversifies to include modern foreign languages and the humanities from Year 3. Pupils at the Senior School are set homework across all subjects following the quantity and duration guidelines set out in the Homework Related Document, which vary by year group. Feedback from homework is always provided and includes written, verbal and peer feedback as appropriate. Typically, teachers will then give some time for pupils to read and react to that feedback in the next available lesson.

7. EXAMINATIONS

- 7.1. All pupils sit baseline assessments as they move through the Prep and Senior Schools, providing important information about pupils' comparative developed ability. All pupils also sit internal examinations in each year group, which provides some comparative, standardised summative data about their learning.
- 7.2. Reception - Year 6 complete an end of year standardised maths, reading and spelling test. From Year 7 to Year 10, and Year 12, pupils complete standardised, summative end of year examinations in May and/or June. Year 11 and Year 13 sit mock examinations mainly in January before sitting their public examinations in May and June. In the Senior School, several subjects have Non-Examination Assessments (NEAs) forming part of their public examination outcomes which require careful adherence to the national guidelines. There is also the GCSE English Language spoken language endorsement and the A Level sciences practical endorsement; each are included on results certificates but do not contribute to the grade achieved.
- 7.3. Due consideration is given throughout for those pupils with Special Educational Needs and Disabilities (SEND), many of whom have needs that require specific access arrangements to be made.
- 7.4. As part of the Annual Review, Heads of Department and Subject Coordinators in the Senior School analyse public examination results to inform and update their Development Plans.

8. ACADEMIC TRANSITION THROUGH THE SCHOOL

- 8.1. STAHS is a proud through-school. It is hoped and expected that all pupils undertake successful and enjoyable journeys through STAHS. They should leave the school both with the academic qualifications to have a choice about their futures, and the skills to thrive where they choose to go. Where educational

evidence indicates that positive educational outcomes are at risk of not being reached, meaningful intervention in partnership with pupils, parents and staff should be utilised to help the pupil to succeed.

- 8.2. The School may decide to alter a pupil's programme of study before or during a course of study. This is at the School's discretion and would normally be the result of a significant academic, pastoral, medical or special educational need.
- 8.3. The School may decide to alter pupils' classes or teaching groups. This most often takes place when moving from one year group to the next, for example from Year 8 into Year 9. This decision would be made by the School for educational reasons. Pupil, parent or teacher preference is not an acceptable reason to change classes or teaching groups of a pupil, and the school will not make changes at the request of individuals.
- 8.4. Academic thresholds are explained in the Related Document, outlining our expectations of pupils moving between each stage. In the interest of integrity, clarity, and transparency, we will engage openly with families and pupils when there is evidence that any child may no longer be able to thrive within the STAHS community. Pupils are admitted to the School on the basis that they will be able to enjoy our educational opportunities and meet our high academic expectations. All decisions and interventions made in relation to transition will be made in line with our related document on Special Educational Needs and Disabilities (SEND), and with due regard to the Equality Act 2010.
